

Initialisation of sets:

$$\text{MPR} = \emptyset$$

$$N(A) = \{B, C, G\}$$

$$N^2(A) = \{D, E, F\}$$

After rule 1 is applied:

$$\text{MPR} = \{B, C\}$$

$$N(A) = \{G\}$$

$$N^2(A) = \{D, E, \cancel{F}\}$$

After rule 2 is applied:

$$\text{MPR} = \{B\}$$

$$N(A) = \{C, G\}$$

$$N^2(A) = \{\cancel{D}, \cancel{E}, \cancel{F}\}$$
