

Initialisation of Sets:

$$MPR = \emptyset$$

$$N(A) = \{B, C, G\}$$

$$N^2(A) = \{D, E, F\}$$

Once rule 1 is applied:

$$MPR = \{B\}$$

$$N(A) = \{C, G\}$$

$$N^2(A) = \{D, E, \cancel{F}\}$$

Once rule 2 is applied:

$$MPR = \{B, C\}$$

$$N(A) = \{G\}$$

$$N^2(A) = \{\cancel{D}, \cancel{E}, \cancel{F}\}$$
